Practical Experience

Name of Tool: introduction to agroecology and the role of advisers

Aim of the Tool:

- To introduce the concept of agroecology as an orientation
- To show the different scientific approaches on agroecology
- To explain the different dimensions agroecology
- To put agroecology in a global approach about food and hunger
- To think critical about agroecology and the own job
- To think about the role of advisers in the frame of agroecology

Target public:

Advisers

Methodology:

- Organize a meeting with an expert (scientific) on agroecology and advisers
- The expert gives a presentation about the concept, its different interpretations, its evolution and its global meaning
- There is timing for questions
- Then the group of advisers is divided in small groups of 4 persons
- Each group has to answer some questions:
 - Which of the tasks in your job fit within the frame of agroecology?
 - Which do not?
 - Do you recognize agroecological aspects in the farmers you meet?
 - How can an adviser play a role in transferring agroecological knowledge or experiences?
 - Other remarques
- After 30' there is a global discussion on the different answers.
