Description of practical experience

Name of practical experience: public demonstration of experiment with solar-powered pump in

meadow bird farming

Aim of the experience:

- To show an experiment set up by a collaboration of farmer and advisor
- To bring together farmers, nature people, volunteers, citizens, experts (politicians)
- To exchange agroecological knowledge & experiences,
- To connect and strengthen ties between farmers and nature ngo's
- To show results of cooperation, to learn from each other or to learn from experts

Target public:

- Nature ngo's
- Farmers
- Citizens of neighbourhood
- Scientific Experts
- Advisors
- Politicians

Methodology:

- Invite people involved with (and interested in) farming and meadow birds to the farm of a farmer who uses the solar-powered pump
- Demonstration of the experiment of the solar-powered pump
- Farmer and advisor explain about the use and the advantages of the pump
- Informal discussion and networking moment

Material:

Solar-powered pump

Presentation with explanation

(Expected) results:

- People exchange their knowledge and experience
- Bounds between farmers & nature ngo's
- Better understanding for citizens, politicians, expert
- Better cooperation between farmers, nature people, volunteers, citizens, experts (politicians)

Time frame:

The event: half a day

Preparation 2-3 full days
